INVITATION

Ultrasound Course in Neurosurgery

Dear Madam/Sir,

We would like to invite you for the training course that will be held at the Faculty of Medicine of Porto University.

The training will be chaired by Prof. Rui Vaz Head of the Neurosurgery Department and as course directors Dra. Marisa Cunha and Dr. Bruno Carvalho.

We will have as International invited speaker Prof. Geirmund Unsgård.

As ultrasound is a technology that is widely used in the most varied surgical areas, its use by the neurosurgeon is often underutilized due to the learning curve for spatial orientation and image interpretation. In this context, given the inexistence of an intraoperative ultrasound course in neurosurgery in Portugal and its application in numerous neurosurgical pathologies (brain tumors, Chiari malformations, hydrocephalus, infectious pathology), we consider it a unique opportunity to carry out a training course in this area.

The aim of this eminently practical course is to teach the skills necessary for the use of intraoperative ultrasound in Neurosurgery, with particular emphasis in Neuro-Oncology. In addition to the theoretical knowledge provided, participants will have at their disposal some ultrasound equipment, phantoms and practical models that will allow training in orientation and image interpretation (brain tumor model, ventricular punctures, neuronavigated ultrasound).

You will find attached the complete preliminary program.

Registration:

<https://forms.office.com/r/Wn8c4DswFQ>

Course Fee: 100€

Cancellation Policy: Until 15th April total reimbursement
After 15th April no possible reimbursement

If you are interested in more information or register in the present training course, please do not hesitate to contact as we are willing to help you:
